SUMMARY

Builder and three-time founder with an MS in Business Analytics. I sit down with stakeholders, pin down what they actually need, build it fast, and get it adopted, from a scheduling system that cut errors 94% to a solo-built RAG app.

EXPERIENCE

Imaginovo — Chicago, IL
Founder & Developer, NovoMemo — *Aug 2026 – Present*

- Designed and launched NovoMemo, a cross-platform AI notes app (TypeScript, Expo/React Native, Supabase) that answers questions only from a user's own notes, with clickable source citations.
- Built the retrieval pipeline end to end: heading-aware chunking, OpenAI embeddings in Postgres/pgvector (HNSW), a relevance threshold that returns "not found" instead of guessing, and streamed LLM answers via OpenRouter.
- Shipped live billing (RevenueCat/Stripe) and offline-first sync in ~12 weeks solo, directing AI coding agents (Claude Code) through a spec- and test-driven workflow.

UC Law San Francisco, IT Department — San Francisco, CA
IT Support (part-time) — *Oct 2025 – Apr 2026*

- Provided Tier 1/2 hardware, software, and network support and Microsoft 365/SharePoint administration for staff and faculty while completing my MS.

Santa Rosa Junior College — Santa Rosa & Petaluma, CA
Administrative Assistant III · A&R Specialist I · Work Coordinator — *Apr 2022 – Aug 2025*

- Built Lock Scheduler on my own initiative: a Python/SQLite desktop app replacing a 16-year-old manual Excel process that campus police, custodial, and maintenance teams relied on to lock, clean, and service buildings.
- Interviewed all three stakeholder groups to set requirements, shipped in 6 weeks, and ran it alongside the manual process before cutover, cutting scheduling errors 94% (18 → 1 per cycle) and weekly effort from 10 hours to 15 minutes.

PropertySpot (Robot Kudos) — California
Founder — *2020 – 2021*

- Started a real estate marketing business: shot and edited ~100 property tour videos ($199 each) and paired each with a listing website, generating ~$20K in revenue.
- Built propertyspot.net (Laravel, React, MySQL), a self-serve tool that lets agents publish a listing site in under 20 minutes, with address/MLS API integrations, short URLs, and built-in lead capture.

Gamma Direct — Tehran, Iran
Founder — *2008 – 2019*

- Ran a web, hosting, and IT services business solo for 11 years, owning sales, delivery, and support for 50+ small-business clients.
- Built a pipeline turning raw stock-market data into print-ready tables for Donya-e-Eqtesad, Iran's leading financial daily.
- Built a custom ASP financial-news membership platform reused across multiple clients, plus a referral-commission marketing site.

EDUCATION & CERTIFICATIONS

University of California, Davis, MS in Business Analytics · GPA 3.75 — Jun 2026
Practicum, My Growth Marketer: led pricing strategy for a client business and presented recommendations to the MGM team.

Sonoma State University, BS in Business Administration (Management), Minor in Computer Science — Dec 2024
Summa Cum Laude · GPA 4.0 · Presidential Scholarship · Beta Gamma Sigma · Phi Theta Kappa

Lean Six Sigma Green Belt, UC Davis — Apr 2026

SKILLS

AI & Data: RAG, LLM APIs (OpenAI, OpenRouter), embeddings, pgvector, Python, SQL, R, ETL & data validation
Web & Apps: TypeScript, React, React Native (Expo), PHP/Laravel, ASP, Supabase, PostgreSQL, MySQL, SQLite
Cloud & Tools: AWS, Cloudflare, Git/GitHub, Stripe, RevenueCat, wxPython
Languages: English (fluent), Persian (native)
